INTRODUCTION

General

In January 1970, the National Agricultural Library announced its new automated cataloging and indexing system (CAIN). One product of the system is camera copy for the publication of monthly issues of the *National Agricultural Library Catalog*.

Monthly issues contain:

1. A list of Main Entries arranged first by broad subject categories, such as Animal Science (25) and Forestry (35), and then alphabetically (by citation number) within each category.
2. Indexes giving access to the Main Entries by means of specific subject headings, personal authors, corporate authors, and titles. These indexes cumulate in June and December.
3. An alphabetical list of Translations of Articles added to the collection during the previous month. These translations are also listed by category in the Main Entries section.

Comments and suggestions about this catalog are solicited and should be addressed to:

Deputy Director for Resource Development
National Agricultural Library
U.S. Department of Agriculture
Beltsville, Md. 20705

Inquiries about technical aspects of the CAIN system should be addressed to:

Chief, Computer Applications
National Agricultural Library
U.S. Department of Agriculture
Beltsville, Md. 20705

Cataloging Information

Rules for Entry and Description.

Since January 1966, the National Agricultural Library has followed, with some exceptions, the *Anglo-American Cataloging Rules*. Requirements and restrictions of the CAIN system in its initial stages result in some departures from the usual content and form of cataloging information. The more obvious differences include the omission of diacriticals and instances of machine-generated capitalization and punctuation which do not conform with standard practice. Also, only a limited number of notes are permitted; and notes generally found in separate paragraphs are printed together as one.

The translated title for foreign works is given in a separate note. This feature was added for the benefit of purchasers of CAIN tapes who may wish to prepare keyword indexes. Reference librarians at the National Agricultural Library also expressed the opinion that this information would be helpful to users of the published catalog and the Library's card catalog.

Classification.

Also in January 1966, as an aid to research libraries, NAL began to use Library of Congress classification for newly cataloged titles. This publication reflects use of this scheme as well as the Scheme of Classification for the United States Department of Agriculture Library which was used formerly. Analytics for serial titles and serials originally cataloged prior to 1966 are classified in the USDA scheme.

The call number appears at the bottom left of each entry. A lowercase "a," or a capital "A" before a numeral, at the beginning of a classification number, indicates the publication is issued by the United States Department of Agriculture. The classification number "1" or "1" followed by a decimal point and additional numbers also indicates a Department publication. Other special types of materials are similarly identified, e.g., "Fo" for folios, "j" for juvenile literature, and "R-" for rare materials.

Tracing.

Tracing of subjects and added entries is given in traditional form, except that it is preceded by numerals in parentheses which indicate the broad subject category of the title. The subject categories have been somewhat revised and appear with their numerical designation in the Table of Contents. Categories 05-65 represent fields of interest particularly important to the agricultural community at the present time. Auxiliary categories 70-97 cover literature which the Library collects in order to provide necessary general and supportive information.

Except for important publications of the United States Department of Agriculture, ordinarily analytics for monographs in series do not include tracings, with the exception of those for title added entries. Each analytic includes the broad subject numerical designation and appears in the listing of Main Entries.

When the tracing shows more than one subject category number, the citation appears in each traced category section of the Main Entries. However, only the listing in the primary category carries the consecutive citation number, and the indexes lead only to this listing of the publication.

Serials.

The phrase "Only current numbers kept," following "Apply for issue or volume desired," indicates that the Library has holdings of the serial title only for the current year and the year immediately past. Prior issues are discarded.

Beginning collation for serials is shown only when the Library has the first published issue in hand at the time of cataloging. Serial holdings are not shown. Serial history is excluded except for a note about the immediately preceding entry when an issuing office or title change takes place. In this case the change is cataloged as new, but the previously assigned call number is retained.

Alphabetization

Entries in this catalog have been sorted by computer in the following sequence:

- Space
- Special marks
 - . (period)
 -) (right parenthesis)
 - (hyphen)
 - , (comma)
 - ((left parenthesis)
 - ' (apostrophe)
- Letters: A-Z
- Numerals: 0-9

AVAILABILITY OF REFERENCES CITED

Free Distribution. Most of the printed publications of the Department of Agriculture, and publications issued by the State Experiment Stations and the State Agricultural Extension Services, may be obtained free of charge by applying directly to the issuing agency. The National Agricultural Library does not distribute them.

Loans. The National Agricultural Library lends most books from the collections to the following groups for one month:

1. All employees of the U.S. Department of Agriculture;
2. USDA Field Libraries, land-grant colleges, and network libraries;
3. The National Library of Medicine, the Library of Congress, and foreign national libraries;
4. Approved professional societies and research institutions;
5. Selected libraries with which NAL shares reciprocal arrangements; and
6. Approved U.S. Government and foreign embassy personnel working in the Washington metropolitan area.

Serials and other noncirculating materials are available for use only in the Library or its designated reading rooms in the Washington, D.C., area. The facilities of these reading rooms may be used by qualified researchers and students from the general public.

Photoduplication. The Library reserves the right to provide photocopy in lieu of loan of the serial materials to USDA employees at no cost to the requesters. Others may purchase microfilm or electrostatic copies of documents from the Photocopying Service, National Agricultural Library, U.S. Department of Agriculture, Beltsville, Maryland 20705. Copying charges are:

MICROFILMS: \$1.00 for each 30 pages or fraction copied from a single article or book.

ELECTROSTATIC COPIES: \$1.00 for each 10 pages or fraction copied from a single article or book.

Payment must accompany the order. Cash, Library coupons, check, or money order drawn to the National Agricultural Library, USDA, are acceptable. Library coupons, valued at \$1.00 each, may be purchased in any quantity from the Library's Photocopying Service. Payment for orders originating outside the United States should be made by international money order or draft on an American bank, or by UNESCO book coupons. Superintendent of Documents coupons and requests to furnish photocopy to be paid from Superintendent of Documents deposit funds cannot be honored. Credit may be extended only to U.S. Government agencies and selected institutions. Billing address should be indicated.
